TAPSERWOOD CABINETS · FREE KITCHEN LAYOUT

MEASURE & QUOTE GUIDE

Get a free cabinet layout & quote. Here's *exactly* what we need.

No designer visit required. Send us a few photos, your measurements, and a quick sketch — and we'll design a custom cabinet layout and send you a detailed quote, usually **within 24 hours**.

1 · Photos
Snap each wall of your kitchen.

2 · Measure
Wall lengths, ceiling, windows & doors.

3 · Sketch
A quick top-down drawing.

01 What we need from you

Just three things. Together they let us design your kitchen and price it accurately — from anywhere in the country.

1 · PHOTOS

Your space

Clear photos of every wall and corner of your kitchen, plus windows, doors and appliances.

2 · MEASUREMENTS

The numbers

Wall lengths, ceiling height, and the size & position of windows, doors and appliances — in inches.

3 · A SKETCH

Your layout

A simple top-down drawing of the room with your measurements written on it. Hand-drawn is perfect.

WHY IT MATTERS

The more accurate your measurements, the more accurate your layout and quote. It's worth taking 15 minutes to get these right — it saves changes later.

02 How to measure

All you need is a tape measure and this page. Always measure in **inches**.

1. **Measure each wall, corner to corner.**
   Along the floor, from one corner to the next. Write down the length of every wall that will have cabinets.

2. **Measure the ceiling height.**
   Floor to ceiling. Note it if it changes anywhere (soffits, bulkheads).

3. **Windows — 4 numbers each.**
   Width, height, distance from the nearest corner, and height from the floor to the bottom of the window.

4. **Doors & openings — width + position.**
   Measure the opening width and how far it sits from the corner.

5. **Mark your fixed items.**
   Where the sink/plumbing, range/stove, refrigerator, dishwasher, outlets and vent/range hood are (or should go).

> **TWO QUICK RULES**
>
> Measure at the **widest point**, and don't include the baseboard. If a wall isn't perfectly straight, use the **shortest** distance so cabinets are sure to fit.

03 Photos to take

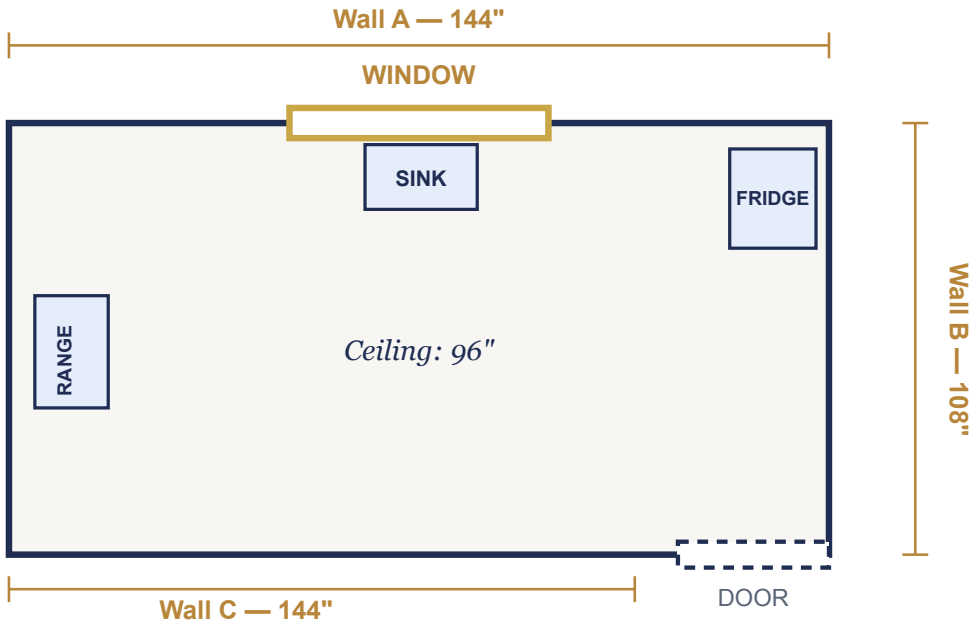
Stand back so the whole wall fits in the frame. Good daylight helps. Check each one off as you go.

- [ ] **Each wall** — straight on, one photo per wall
- [ ] **The whole room** — from each corner
- [ ] **Every window** — and the wall around it
- [ ] **Every door & opening**
- [ ] **The sink** / plumbing location
- [ ] **The range / stove** location
- [ ] **The refrigerator** space
- [ ] **Dishwasher & outlets**
- [ ] **The ceiling** and any soffits
- [ ] **Anything unusual** — columns, vents, angled walls

> **TIP**
>
> If you have an existing floor plan, blueprint or a previous quote — send that too. It speeds everything up.

04 Draw a quick sketch

This is the single most helpful thing you can send. A simple top-down drawing — like looking down at your kitchen from above — with the wall lengths written on it.



Example only — yours can be hand-drawn on paper. Just label each wall's length, the window & door positions, ceiling height, and where the sink, range and fridge go.

LABEL THESE ON YOUR SKETCH

Every wall length · ceiling height · each window (size + position) · doors/openings · sink · range/stove · refrigerator · dishwasher · vent/range hood.

05 Your measurement worksheet

Fill this in as you measure, or just include the same numbers with your sketch. All measurements in inches.

ITEM	MEASUREMENT
Wall A — length	
Wall B — length	
Wall C — length	
Wall D — length (if any)	
Ceiling height	
Window 1 — W × H, from corner, from floor	
Window 2 — W × H, from corner, from floor	
Door / opening — width + position	
Sink — distance from corner	
Range / stove — distance from corner	
Refrigerator — space width	

Also tell us: your **cabinet style**, whether you're a **homeowner, contractor or designer**, your **timeline**, and the best way to reach you.

06 Send it & what happens next

Once you have your photos, measurements and sketch, send them over — it's free and there's no obligation.

How to send

Upload everything at **tapserwoodcabinets.com/my-quote**, or reply to us with your photos and worksheet attached.

What happens next

1. **We review** your space and measurements.
2. **We design** a cabinet layout tailored to your kitchen.
3. **We send your quote** — a detailed, itemized estimate at wholesale pricing, usually **within 24 hours**.

NO GUESSWORK, NO PRESSURE

Your layout and quote are free. If you'd like changes, we'll revise them — and only when you're happy do you place your order.
